Hive[®] notation

1) Turn the pieces with a vertex pointing downwards so that any adjacent piece is clearly either left or right.

2) The pieces are designated by the first letter of their english names and numbered in the order they are added to the hive.

Ant
 Beetle
 Grasshopper
 Ladybug
 Mosquito
 Pillbug
 Queen Bee
 Spider

3) Moves are noted by naming the moving piece first, then the piece it attaches to, either preceded or followed by /, \ or - to indicate the relative position of the moving piece with reference to the piece it attaches to (see diagram below).

/ (1), - (2), \ (3) before the name of the reference piece if the piece moves left to the reference piece.

/ (4), - (5), \ (6) after the name of the reference piece if the piece moves right to the reference piece.

It doesn't matter which piece is used as a reference. For the first move in the game, or beetle climbing on top moves, no direction is given.
